Apr 17, 2019 In fact, this microphone modeling plug-in is compatible with most of the major recording softwares like Ableton Live, Pro Tools, Cubase and Logic, Sonar,.The present invention relates to a device for fastening objects to a baseplate, in particular to a device for fastening an impact bar to the baseplate of a motor vehicle. In a known fastening device for impact bars, the latter are snapped into a baseplate, for example, by means of a rivet or a screw bolt and nut, these devices being suitable for use as a connection of various types of impact bars, for example, as bumpers or as aero-dynamic stabilizers. Such a baseplate comprises a drilled hole into which a screw bolt is screwed. The known screw bolt serves to connect the impact bar to the baseplate by means of a threaded bolt. This device has a number of disadvantages. For instance, the method of connection between the screw bolt and the impact bar is laborious and has the additional disadvantage that, due to the threaded connection, with high axial forces, there is a risk of the impact bar being pulled out of the baseplate. In addition, the known fastening device is not suitable for connecting the impact bar to the baseplate of a motor vehicle, in particular, of a motor vehicle equipped with a V-shaped space. It is therefore an object of the present invention to provide a fastening device for objects, in particular, for connecting an impact bar to a baseplate, which does not have the above-mentioned disadvantages. In a device according to the present invention, the impact bar is fastened to the baseplate with fastening forces that are oriented in the transverse direction. It is thus possible to fasten the impact bar to the baseplate in a simple manner by means of a fastening device, which ensures that the impact bar remains connected to the baseplate and does not readily become detached therefrom.
